Have you ever started on a journey to a specific destination only to end up somewhere completely different? As writer-producer Ronna Prince began filming, she had no intention of sharing her long buried secrets. But by courageously revealing her childhood abuse, the film evolved into a compelling documentary about healing, forgiveness and transformation. More than just a compilation of facts, this film contains step-by-step suggestions on how to live fully in the heart. Ronna brings together a stellar cast of leading scientists, teachers and indigenous elders from around the world to present

the primary message of the film: We are all connected through the human heart. The heart truly creates a unified field among people AND connects us with the harmonic field of earth itself.
