Prince, the film's producer, visionary and writer, who was inspired to make the film in order to explore the connection between the mind and the heart.

This enlightening documentary provides a wealth of tools, information and most of all, inspiration to invite you deeper into your own journey of heart connection to yourself and the interconnected world around you. According to the latest science highlighted in the film, the heart is the single organ that not only creates a unified field among all people but also creates a harmonic field with the earth itself.

“In producing the film, I connected with many cutting edge researchers who were exploring this paradigm shift from head to heart from a number of different angles,” shares Prince. “With Sedona-based director Skip Thomas, we were led fortuitously back to the ancient wisdom traditions of native peoples from all over the world. Their message is enduring, inspiring and most of all, confirms -- the heart is where the action is!”

Sacred Journey of the Heart premieres at Harkins Camelview 5 Theatre in Scottsdale on October 19th with a post screening Q&A with many of the cast members and it will be available on DVD on November 11th.
